WHAT IS FOLARUM?

Folarum is a decentralized ecosystem centered around its community of users.

Main Project Goals:

We have built a bridge between two major domains of blockchain assets (cryptocurrency/NFTs), enabling token holders (primary stakeholders) and NFT holders (secondary stakeholders) to benefit from the growth of all aspects of the ecosystem.

ECOSYSTEM COMPONENTS

FLRB
TOKEN

FLRX
TOKEN

FOLAR

COLLECTIONS

HOW DID IT BEGIN?

THE CRYPTO COMMUNITY'S UNIVERSAL CHALLENGE: RISK!

THE ENTIRE CRYPTO COMMUNITY (AND OTHER FINANCIAL MARKETS) HAS ALWAYS FACED ONE CRITICAL CHALLENGE: RISK.

WHEN MARKET SENTIMENT TURNS BEARISH, INVESTORS SUFFER LOSSES—BOTH MINOR AND CATASTROPHIC—AND THIS CYCLE REPEATS INDEFINITELY.

ON THE FLIP SIDE, WHEN AN ASSET SURGES, HOLDERS PROFIT ONLY ONCE. THIS REALITY LED US TO QUESTION:

HOW CAN INVESTORS GENERATE CONTINUOUS RETURNS FROM HOLDING AN ASSET, REGARDLESS OF MARKET CONDITIONS?

THUS, AN IDEA WAS BORN:

#HOLD_TO_EARN

TOKENS

THE TWO-TOKEN ECOSYSTEM

- 1. BASE TOKEN: FLRB**
FIXED SUPPLY:
490,000,000 (NON-
MINTABLE, NON-
BURNABLE).

- 2. UTILITY TOKEN: FLRx**
UNLIMITED SUPPLY
MINTABLE BY USERS,
BURNABLE BY THE
ECOSYSTEM.

CORE MECHANISM

FLRb holders can mint FLRx indefinitely, while the ecosystem ensures perpetual demand for FLRx.

All protocols are designed to burn FLRx, keeping demand ahead of supply.

Result: FLRb holders continuously supply FLRx to the ecosystem, earning a share of every transaction

FOLARYZ

(DEFI & MINTING PLATFORM)

FLRb holders mint FLRx in real-time via a countdown-based smart contract.

No time limits: Users can withdraw FLRb or continue minting indefinitely.

Minting rate: 2x FLRx per FLRb held monthly.

Minimums:

300 FLRb to initiate a contract.

300 FLRx to withdraw.

This is how **#HOLD_TO_EARN** works:

Folaryz's minting mechanism + FLRx burn-driven demand.

FOLAR SHOP

WEB 3.0 COMMERCE HUB

A marketplace for digital products/services (business development, Web3 tools, and everyday utilities).

All purchases require FLRx, which is burned post-transaction.

Sustains demand and controls inflation.

FOLAREX

AMM DEX

A decentralized exchange for any BSC-based token.

Users can create liquidity pools for any token pair.

Transaction fees: Paid indirectly in FLRx (converted automatically via smart contracts, then BURNED).

Creates buy pressure for FLRx while reducing its supply.

ROAD MAP

Here's the critical point: These four foundational initiatives are not sequential.

Unlike traditional roadmaps that require step-by-step completion, our team has the capacity to execute all four domains in parallel:

1. FLRb Presale
2. Folaryz (FLRx Minting Platform)
3. FolarShop (Web3 Marketplace)
4. Folarex(AMM Dex)

Why This Matters

No Bottlenecks: Progress in one area doesn't block another.

Faster Ecosystem Growth: Simultaneous deployment accelerates adoption.

Modular Flexibility: Each component can evolve independently while integrating seamlessly.

This parallelized development approach is a testament to our team's technical agility and commitment to rapid, scalable innovation

NFT COLLECTIONS

COLLATERAL FOR FLRB LOANS

To mint FLRx via loans, users must hold an ecosystem NFT. Detailed NFT utility (e.g., collateral terms) will be revealed at the official collection launch.
